

Community Internship Partner Data

Ratanayake, H. (2015). *Griffith Community Internship Survey Outcomes*. Brisbane: Griffith University.

In 2015, we commissioned an independent survey to evaluate the partners' perceptions and experiences across a range of domains. To better ensure representative responses of students and processes, the program focused the survey on organisations (n = 104) who had hosted a minimum of 5 Internships. Below is a selection of the results from this survey.

Figure 5: The mean of students' improvements witnessed by partners

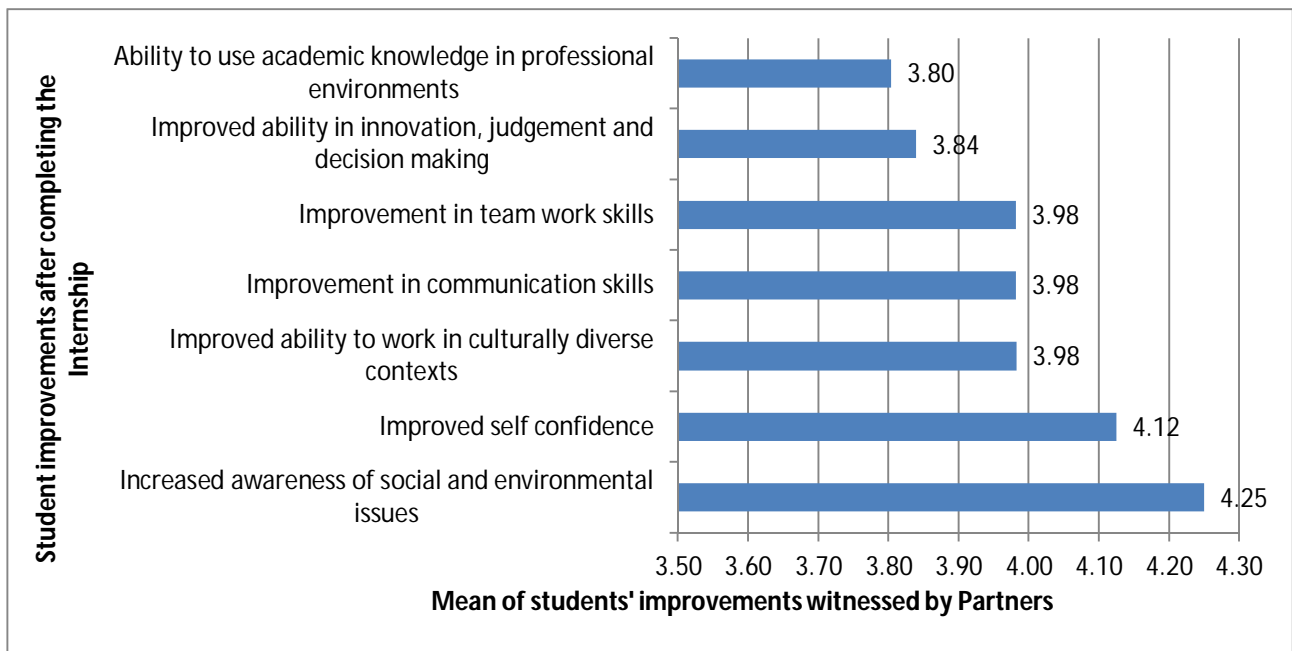

Figure 6: Percent of Partner satisfaction with Community Internship students from Griffith University

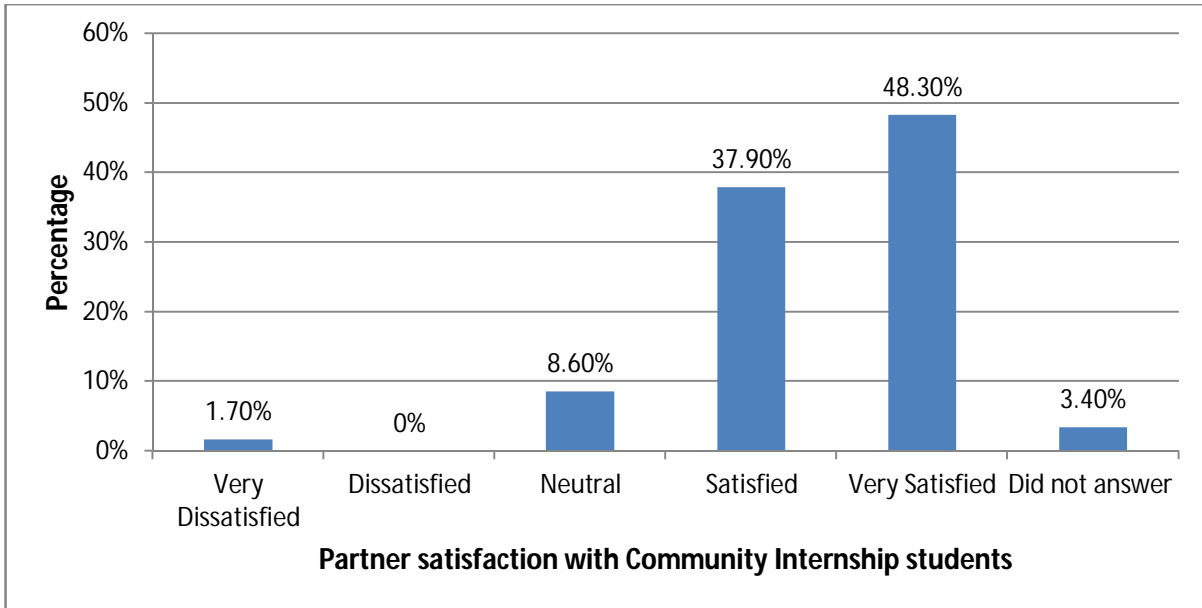

Figure 7: Percent of partner consideration of employing Community Internship students if a suitable position becomes available after they complete the internship in the organisation

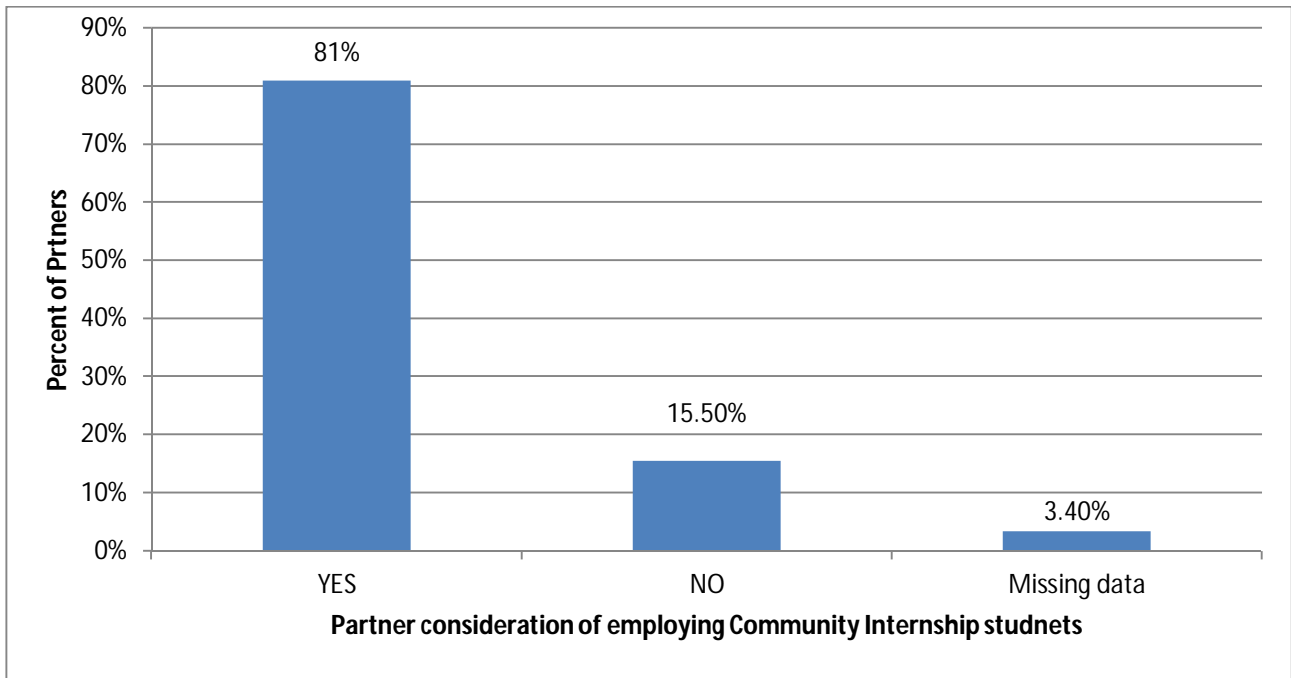

Figure 8: Partner willingness to recruit disadvantaged or international students
